

POULLOMI TARAT

B.Sc. Cancer Biology | Research Intern | Cancer & Molecular Biology

poullomii@gmail.com | +91 60010 17110 | linkedin.com/in/poullomi-tarat-845125341

RESEARCH PROFILE

Undergraduate Cancer Biology student with an 9.02/10 CGPA and practical exposure to clinical research, cancer biology and molecular laboratory methods. Experienced in Phase III clinical-trial work in head and neck squamous cell carcinoma and clinical research at PGIMER Chandigarh. Research interests include chromosomal instability, genome stability, chromothripsis, cancer immunology, cGAS–STING and virus-associated cancers.

EDUCATION

B.Sc. Cancer Biology — Institute of Translational Health Sciences, Rayat Bahra University | Expected June 2027

Current CGPA: 8.98/10 | Coursework: molecular & cellular biology, cancer pathophysiology, experimental methods, data analysis

Class XII — Sai Vikash College, Guwahati | 74.8%

Class X- Don Bosco School, Guwahati | 90.8%

RESEARCH & CLINICAL EXPERIENCE

Clinical Research Coordinator Intern — PGIMER, Chandigarh | Department of Otolaryngology

- Clinical research exposure in an academic hospital setting, including research coordination and study-related activities.

Clinical Research / Trainee CRC — Mazumdar Shaw Medical Foundation + Narayana Hospitals, Bengaluru | 2 months

- Exposure to Phase III clinical trials in head and neck squamous cell carcinoma.
- Supported clinical-trial processes and developed practical understanding of translational cancer research.

Research Intern Trainee — Acmegrade

- Worked on AI/ML-oriented biomedical research tasks, including data preprocessing, algorithm testing and interpretation of biological data patterns.
- Gained exposure to computational tools and bioinformatics approaches relevant to biomedical and cancer research.

LABORATORY & RESEARCH SKILLS

Molecular/Lab: PCR, gel electrophoresis, tissue processing, basic cell culture, spectrophotometry, laboratory safety

Research: Literature review, scientific writing, clinical research exposure, biomedical data interpretation, research presentation

Interests: Chromosomal instability & genome stability, chromothripsis, cancer immunology, cGAS–STING, virus-associated cancers, tumour biology

ACADEMIC WORKS

- Chromosomal Instability–Driven Immunotherapy — literature-based research proposal exploring genomic instability and immune-targeted approaches in cancer.
- cGAS–STING in Cancer — investigation of DNA-sensing pathways and their relevance to anti-tumour immunity.
- HPV / Cervical Cancer — academic work on HPV-associated cervical carcinogenesis and CIN.

AWARDS & HONORS

- Pragyan Bharati Award — Assam Higher Secondary Education Council, 2022
- Anundoram Borooah Award — Secondary Board of Education Assam, 2020
- NSS National Adventure Camp — ABVIMAS, 2024
- Distinction Holder — HSC Examination | Star Mark Holder — SSC Examination
- Achiever's Award at RBU Summit 2026 | 9+ CGPA – University Examination

RESEARCH INTERNSHIP AVAILABILITY

Available for a full-time undergraduate research internship in , with particular interest in cancer genome instability, molecular cancer biology and cancer immunology.
